Listing of Claims:

     1.   (Currently Amended) A printing service system
comprising:

     a ~~service~~ server device which comprises a storage portion
having a main image and a thumbnail image <u>corresponding to the</u>
<u>main image</u> stored therein;

     a portable ~~information device~~ <u>telephone</u> which provides
access to the server device via a network to receive a desired
thumbnail image and ~~its~~ <u>an image</u> number <u>corresponding thereto</u>
from the ~~storage~~ <u>server</u> device, and ~~which~~ transmits the image
number <u>corresponding to the thumbnail image;</u> ~~to a printing~~
~~device, corresponding to the thumbnail image;~~ and

     a printing device which <u>receives the image number</u>
<u>transmitted from the portable telephone, and which</u> downloads ~~and~~
~~prints~~ <u>from the server device via the network</u> the main image
~~which corresponds~~ <u>corresponding</u> to the thumbnail image specified
<u>by the image number transmitted</u> from the portable ~~information~~
~~device~~ <u>telephone, and which prints the downloaded main image;</u>
~~from the server device via the network~~

     <u>wherein the server device collects a print charge for</u>
<u>printing the main image by the printing device by adding the</u>
<u>print charge to a telephone call charge</u>.

2.   (Currently Amended) A printing service system according
to claim 1, wherein the portable ~~information device~~ telephone
further comprises a display portion to display the thumbnail
image and an input portion for a user to input a command.

3.   (Currently Amended) A printing service system according
to claim 1, wherein the portable ~~information device~~ telephone
further comprises a storage portion which stores ~~a~~ the thumbnail
image and a display portion to display ~~a~~ the thumbnail image.

Claims 4-7 (Canceled).

8.   (Currently Amended) A server device comprising:
a first storage portion having ~~stored therein~~ a main image
and a thumbnail image corresponding to the main image stored
therein;

5   a second storage portion having a program stored therein;
a communication portion connected to a network to ~~connect an~~
~~external device~~ communicate with a portable telephone and a
printing device; and
a control portion which ~~reading~~ reads out ~~the~~ a specified

10   thumbnail image, which is specified by the portable telephone via
the network, from the first storage portion in accordance with ~~a~~

-4-

the program stored by the second storage portion ~~, followed by~~
~~delivering~~ and delivers the read out thumbnail image from the
communication portion to ~~an external device~~ the portable

15   telephone via the network, and which reads out the main image
~~presented via the network~~ corresponding to the thumbnail
image from the first storage portion ~~, followed by delivering~~ and
delivers the read out main image from the communication portion
to the ~~external~~ printing device via the network;

20   wherein the server device collects a print charge for
printing the main image by the printing device by adding the
print charge to a telephone call charge.

       Claims 9-18 (Canceled).

       19. (Currently Amended) A printing service system
comprising:
       a server device which comprises a storage portion having a
main image and a thumbnail image corresponding to the main image
5   stored therein;
       a portable ~~information device~~ telephone which provides
access to the server device via a network to receive a desired
thumbnail image and an image number corresponding thereto from
the storage device, and which transmits the image number

10   corresponding to the thumbnail image, the portable telephone

comprising: ~~which is provided with~~ storage means for storing ~~a~~

the thumbnail image, display means for displaying ~~a~~ the thumbnail

image, and input means for a user to input a command; ~~, and which~~

~~provides access to the server device via a network to receive a~~

15   ~~desired thumbnail image and its number from the server device,~~

~~and transmits the image number to a printing device,~~

~~corresponding to the thumbnail image,~~ and

printing means for receiving the image number transmitted

from the portable telephone, for downloading from the server

20   device via the network ~~and printing~~ the main image ~~which~~

~~corresponds~~ corresponding to the image number ~~specified~~

transmitted from the portable ~~information device from the server~~

~~device via the network~~ telephone, and for printing the downloaded

main image;

25   wherein the server device collects a print charge for

printing the main image by the printing means by adding the print

charge to a telephone call charge.
